DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 31-38, and 51-54, drawn to a method and apparatus for applying a capitalization or spacing rule to words obtained from an EPG, classified in class 725, subclass 44.
- II. Claims 13-17 and 39-43, drawn to a method and apparatus for searching for keywords in an EPG which match a television program's characteristics, classified in class 725, subclass 45.
- III. Claims 18-30, 44-50 and 55-60, drawn to a method and apparatus for analyzing EPG data and assigning an event identifier to a TV program by analyzing program characteristics, classified in class 725, subclass 38.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as capitalizing words and spacing them properly to make it easier to read. Subcombination II searches for keywords that match TV program

characteristics, and Subcombination II assigns an event ID to a TV program by analyzing program characteristics. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
